

**PRINT THIS**

# SP501 SOLAR MINI

## Solar Hot Water System (1.9 SQM with MPPTt)

**Description:** this is a ENTRY LEVEL solar hot water system designed to retrofit into existing homes where there is tight space around the existing cylinder.

**Operation:** whilst it will work all year round, it is designed for:

- primary spring/summer/autumn use in UK/Ireland ( 1-2 persons)
- all year round use in sunny climates

Components	Description	Quantity
SP501 Solar Collectors	Fully Assembled Solar Collectors, (collector package includes, long life roof mounting kit and plumbing kit)	2
Circuit pipe work	DN12 Solaflex Stainless Steel (10M, 15M, 25M)	choose
Circuit pipe work	DN12 fittings to connect the pipework	6
RESOL Pump Station	Model: PAW Flowcon pump station with BS Plus controller (do not use dual channel pump stations as the high temperatures in Surface Power collectors can melt plastic non-return valves) USE SINGLE CHANNEL PUMP STATION ONLY.	1
Expansion vessel & Bracket Kit	Model: Matching 18L expansion vessel for PAW Flowcon pump station as listed above.	1
Antifreeze	Tyfocor or Total Fluid Solutions - (Premixed)	1
Circuit fluid	Use premixed antifreeze only for -30C	1
Roof sealant	Tube of specialised roof sealant	1
Roof entry	Gasket, lead, vent tile or other suitable entry point, (both pipes enter through 1 point only)	1
Solar Cylinder	160L; There are various dual coil solar cylinders available, send us the specifications if you are unsure, (copper options)	Options
Online Services	Full online support & user interface options available	Option
